

# JustTouchOrder

## Welcome To JustTouchOrder

We are not only the #1 choice in point of sale but have a great online ordering system that talks directly to your in-store POS, order printers and kitchen video screens for a fully connected solution.

JustTouchOrder is an online customer ordering service which provides your customers with a easy and convenient way to place orders from **Anywhere at Any time.**

You may not be open 24x7 but there's no reason not to allow orders to be pre-placed for when you are open.

*"Clear, easy to navigate and user friendly."*

## CUSTOMER OPERATION

- Customers register online to use the order service directly for your business which helps with customer retention & re-orders
- Your online order menu is under your control directly from your JustTouchPOS system. You decide which products are available
- Pricing for items on the online menu can be the same or different from your regular pricing to take account of packaging
- Customers can browse your menu online on phone, tablet, or any web-enabled device
- Items are clearly defined with product images to enhance sales with full add-on's and options available
- Once the customer has finished adding items they can make payment quickly and easily using the built-in payment options
- Set your available operating times for service including split shifts if service is closed
- If used for in-venue orders then a table number can be automatically sent with the order for easy customer location

## IN-HOUSE OPERATION

- JustTouchOrder is fully integrated with your JustTouchPOS
- Customer orders are sent directly to the POS terminals and displayed under the Advance Orders tab
- Received orders are printed to the required kitchen order prep or kitchen display screens with customer details / pickup times
- Once orders have been dispensed they are simply marked complete at any POS terminal

## TAKE ORDERS 24X7

- You can define your opening and serving hours for when orders can be collected or dispensed
- Enable customers to place their order from their desk ready for a lunch-time pickup or before their commute home
- Allow contactless in-venue ordering to save wait-staff time
